Yang Liu

Date of Birth: 1989–06–26,
Marie-Curie Fellow,
Mathematical Institute, University of Oxford.
Address: S3.08, Mathematical Institute, University of Oxford, Andrew Wiles Building, Radcliffe Observatory Quarter, Woodstock Road, Oxford, OX2 6GG, UK.
Phone: +44 1865 615180.
Homepage:

Email address: liuy3@maths.ox.ac.uk.

Biography

Dr Yang Liu obtained his Bachelor of science in mathematics and applied mathematics from Zhengzhou University in 2010 and his PhD in applied mathematics from City University of Hong Kong in 2015. Since November 2015, he is part of the Department of Mechanics, School of Mechanical Engineering, Tianjin University as a lecturer (November 2015-June 2019) and then as an associate professor (July 2019-September 2023). In September 2023, he joined the Mathematical Institute, University of Oxford as a Marie Curie Research Fellow, working with **Prof. Alain Goriely FRS**.
His research interests encompass various aspects of mathematical modelling of soft active solids with applications to bio-inspired structure design and elastography of biological tissues. His work covers theoretical analysis, finite element simulations, and experimental investigations. He focuses particularly on pattern formation in soft solids and biological tissues, such as buckling, wrinkling, necking, and bulging. His expertise includes asymptotic analysis with applications to bifurcation analysis and wave propagation in soft elastomers, mechanics-guided metamaterials, and reduced theories such as rod/plate/shell models.
He was awarded the ACRI Fellowship in 2019 and the Marie Słkodowska-Curie Fellowship in 2023.

Research highlights

My research focuses on surface wrinkling in film/substrate bilayers within the context of nonlinear elasticity. By employing asymptotic techniques for multiple small parameters, I derive analytical estimates for the critical buckling load and the associated critical pattern in various scenarios. Notably, I extend the Wentzel-Kramers-Brillouin (WKB) method to solve eigenvalue problems arising from bifurcation analysis in curved and graded structures. Through these systematic investigations, I identify a universal scaling law relating the critical buckling load to the modulus ratio between the two layers. Additionally, by integrating finite element simulations with experimental data, I elucidate the effects of modulus gradient and growth gradient on pattern evolution and transition.

In addition to studying periodic instabilities, my research also addresses localization problems in cylindrical tubes and cylinders. I establish analytical bifurcation conditions for localized bulging and necking in inflated bilayer tubes, graded tubes, and solid cylinders with residual stress. Furthermore, through nonlinear post-buckling analysis, I determine the transition between localized bulging and necking.

I have also derived many reduced models for soft materials, such as a consistent plate theory for moderately thick liquid crystal elastomer plates, a refined model for surface wrinkling of film/substrate bilayers, and a one-dimensional model for localization of cylinders that can capture the initiation, evolution and propagation of localized bulging/necking.

I have published 31 research papers in peer-reviewed journals (12 papers as first author and 10 papers as corresponding author) with high impact in solid mechanics and applied mathematics, such as *Journal of Mechanics and Physics of Solids, Proceedings of the Royal Society A, International Journal of Engineering Science, International Journal of Solids and Structures, Mathematics and Mechanics of Solids*, among others. Additionally, I have successfully acquired three grants as the principal investigator from the highly competitive National Natural Science Foundation of China (NSFC), including two General Program grants and one Young Scientists Fund grant.

Experience

11/09/2023–present, Marie Curie Research Fellow, Mathematical Institute, University of Oxford, Oxford, UK.

30/06/2019–present, Associate Professor; Department of Mechanics, School of Mechanical Engineering, Tianjin University, Tianjin, P. R. China.

25/11/2015–29/06/2019, Lecturer; Department of Mechanics, School of Mechanical Engineering, Tianjin University, Tianjin, P. R. China.

20/06/2019–21/07/2019, ACRI Fellow; Department of Mathematics, Mechanics and Management, Polytechnic University of Bari, Italy.

02/05/2018–30/06/2018, Postdoctoral Fellow; Department of Mathematics, City University of HongKong, Hong Kong, P. R. China.

15/05/2016–15/06/2016, Postdoctoral Fellow; Department of Mathematics, City University of HongKong, Hong Kong, P. R. China.

20/06/2023–19/07/2023, Research Associate; Department of Mathematics, City University of HongKong, Hong Kong, P. R. China.

Education

26/08/2010–15/07/2015, Ph.D Candidate; Department of Mathematics, City University of Hong Kong, Hong Kong, P. R. China.
Supervisor: **Prof. Hui-Hui DAI.**

Thesis: Analytic Studies on Bifurcations of a Hyperelastic Layer-Substrate Structure Under Uniaxial Compression.

01/09/2006–02/07/2010, Undergraduate; Department of Mathematics, Zhengzhou University, Zhengzhou, Henan Province, P. R. China.

Research Interests

Mathematical modelling of active solids.

Non-linear elasticity.

Instabilities and wave propagation in soft solids.

Grants

1. **Principal Investigator**: "Research on force/thermal/light-induced deformation of liquid crystal elastomers based on incremental theory and finite-strain plate/shell models" from National Natural Science Foundation of China, Grant No. 12372072, 2024.1-2027.12. RMB 520000.

2. **Principal Investigator**: " Accurate control of bending and twisting of liquid crystal elastomers with applications to mechanical metamaterial designing" from Tianjin University, 2024XPD-0010, 2024.1-2026.12. RMB 400000.

3. **Principal Investigator**: "Pattern Formation in Soft Materials: Reduced Models and Nonlinear Analysis (SOFT-PATTERN)" Marie Słkodowska-Curie fellowship, UKRI, Grant Ref: EP/Y030559/1, 2023.9.11-2025.9.10. GBP 200511.

4. **Principal Investigator**: "Intelligent analysis of cutterhead and digital tunnelling technique" from China Railway Engineering Equipment Group Co., LTD., 2022.7-2023.7. RMB 550000.

5. **Principal Investigator**: "Post-buckling analysis of soft materials with applications to elastic wave regulations" from National Natural Science Foundation of China, Grant No. 12072227, 2021.1-2024.12. RMB 620000.

6. **Principal Investigator**: "Stability and deformation analysis of thin liquid crystal elastomer film and tube under mechanical loads" from National Natural Science Foundation of China, Grant No. 11602163, 2017.1-2019.12. RMB 220000.

Teaching

2024-2025, Oriel College, University of Oxford,
Tutor, Prelims Dynamics.

March 2021-present, Tianjin University,
Undergraduate course: Mechanics of Materials.

March 2021-present,Tianjin University,
Undergraduate course: Advanced Elasticity.

September 2018-present, Tianjin University,
Undergraduate course: Engineering Mechanics.

June 2016-present.
Postgraduate course: Continuum Mechanics (in English).

September 2011-August 2014, City University of Hong Kong
Teaching Assistant (in English), including tutorial lectures and assignments grading.

Honors and Awards

1. Awardee of Cultivating leading innovative talents in science and technology of Tianjin University 'Climbing Plan' 2023.

2. Marie Skłodowska-Curie Fellowship 2023 (granted by EU but funded by UKRI due to 'Brexit')
3. Excellent advisor for master's thesis of Tianjin City in 2022
4. Excellent advisor for master's thesis of Tianjin University in 2021
5. Excellent faculty of Department of Mechanics in 2020
6. Excellent advisor for undergraduate's final year project in 2019
7. Excellent faculty of Department of Mechanics in 2018
8. ACRI "YOUNG INVESTIGATOR TRAINING PROGRAM 2018" fellowship
9. 2018 Zhi-Kang Shen Award of Tianjin University
10. 2010-2014, Postgraduate Studentship (by UGC-allocated funds), City University of Hong Kong.
11. 2010, First-honor class graduate.
12. 2008-2009, National Scholarship.
13. 2007-2008, First-class Scholarship of Zhengzhou University.
14. 2006-2007, Second-class Scholarship of Zhengzhou University.
